

# YASH KUMAR SAIN

Ph. +91-9783181471 | Email: [yashkumarsain66@gmail.com](mailto:yashkumarsain66@gmail.com)

## EDUCATION

Year	Degree/Exam	Institute	CGPA/Marks
2023 <sup>1</sup>	MTech (Dual Degree 5Y) <sup>1</sup>	IIT Kharagpur	7.89/10
2023 <sup>1</sup>	BTech (Dual Degree 5Y) <sup>1</sup>	IIT Kharagpur	7.89/10

## EXPERIENCE

<b>Frontend Tech Lead, Hiccup Dating App</b>	<b>Feb'25 – Oct'25</b>
<ul style="list-style-type: none"> <li>Architected production-grade cross-platform app using Flutter, gRPC, and protobuf with fully async, event-driven communication</li> <li>Implemented robust auth system with refresh tokens, persistent sessions, offline local caching, and seamless recovery across app lifecycle and network transitions</li> <li>Integrated Riverpod-based global state management ensuring SOLID compliance, clean architecture, and scalable async feature integration</li> <li>Maintained &gt;90% crash-free rate with Firebase Crashlytics, performance monitoring, and 23 custom analytics events</li> <li>Designed full post creation and upload system with background compression, retry-backed Dio queueing, and intelligent network-aware state handling</li> <li>Built bidirectional encrypted chat via gRPC streams with live delivery/read receipts and offline synchronization</li> <li>Engineered TikTok-style discovery feed with optimized batch querying, lazy media loading, and swipe-to-profile transitions</li> <li>Implemented proposal and gift catalog feature with Razorpay payments and efficient data reuse across tabs to minimize redundant queries</li> <li>Enabled unified profile editing with optimistic updates and single-call synchronization of all user attributes</li> <li>Ensured GDPR and CCPA compliance for secure data handling, consent tracking, and analytics privacy standards</li> </ul>	
<b>Software Engineer, Optym</b>	
<b>Project 1 – WheelsUp Flights Scheduling</b>	
<ul style="list-style-type: none"> <li>Analyzed and optimized PySQL queries in PostgreSQL database to reduce redundant multi-endpoint calls and improve query efficiency for faster response time</li> <li>Designed complete Entity Relationship Diagram (ERD) for documentation and knowledge transfer of database structure</li> <li>Resolved multiple production bugs across PostgreSQL database, Python backend, and PySQL query layer ensuring consistent data accuracy and backend reliability</li> </ul>	
<b>Project 2 – GateAI   Southwest Airlines</b>	
<ul style="list-style-type: none"> <li>Built and maintained backend services to manage aircraft gate assignments optimizing for minimum gate cost, minimum passenger and crew transfer time, and gate prioritization among owned, shared, and airport gates</li> <li>Designed scalable database schema and APIs using Node.js and TypeScript for event-driven architecture processing ~1M flight events per airport daily</li> <li>Integrated AWS Lambda, EventBridge, RDS (PostgreSQL), SQS, SNS, and SES to handle asynchronous workflows, notifications, and fault-tolerant data ingestion</li> <li>Developed event models for Southwest Airlines' flight, crew, and commodity streams performing real-time data transformation aligned with internal DB schema for optimal processing</li> <li>Implemented complex algorithms for connecting passengers, crew, and commodities including transit time calculations and flight connection validations based on ETA and ETD buffers</li> <li>Refactored major modules to adopt CQRS pattern, SOLID principles, and functional programming improving system maintainability and performance</li> <li>Engineered efficient API layer for optimized data retrieval and restructuring enabling Gate Optimization Engine to produce near real-time scheduling insights for client dashboard</li> <li>Contributed to architecture decisions and bug resolutions saving millions in operational costs and received performance bonus of ₹6 L INR for exceptional work</li> </ul>	

## SKILLS

Flutter (Production-Grade Architecture)	gRPC & Protocol Buffers	Clean Architecture & SOLID Principles
Riverpod State Management	Cross-Platform App Development (iOS & Android)	Backend Integration (Node.js, AWS Lambda, PostgreSQL)
Async Event-Driven Systems	Authentication & Secure Session Management	Payment Gateway Integration (Razorpay, Stripe)
Realtime Chat & Messaging Systems	App Performance & Crash Monitoring (Firebase Suite)	Data Privacy & Compliance (GDPR, CCPA)
UI/UX & Responsive Animations (Material, Cupertino, Glassmorphism)	API Design & Data Modeling	Database Architecture & Query Optimization
